American Classic MTB 26 Disc

Price: £399.00

Take a pound off a bike and you'll feel it on the climbs or when lofting the bike over obstacles. Take that same pound off the bike's wheels and you'll feel it everywhere!

The **American Classic wheels are laterally stiff and showed no signs of weakness on everything from smooth singletrack to rock gardens. We intentionally slammed berms motocross style ( cranked over, inner foot unclipped ) to see if we could find fault - we didn't. If you are in the market for a new set of hoops, good luck finding a better value than these American Classics.**
