Kuota Kharma Bicycle 2010

Price: £1 479.00

New White Colour for 2010

The first thing that you will probably notice about the Kharma is the visual quality of the frame/bike, together with the very attractive price! Now with a monocoque aero seat post with rear wheel cut out-helps improve aerodynamics and rigidity.

The Kharma is the entry level road bike from the Kuota range. But don't let the word 'Entry' fool you! This bike is ideal for the basic enthusiast wanting something fast, light weight, stylish and affordable, through to the most avid racer or sportive rider.

The frame has an average weight of 1260g throughout the range with the size XS weighing an average of 1150g so by no means a slouch in the weight department!

The frame is a monocoque type, constructed from 12K carbon giving super rigidity with oversized headtube and downtube.

The older 'LESS REFINED' Kharma was put on test by Cycling Weekly and came out as performance bike of the year 2007!

- Sram Rival Groupset (shimano price available on request)
- Deda Big Piega Bars/Quattro Stem
